

MICROCLEAN

ANILOX ROLL CLEANING SERVICE

Deliver Consistent Color

Have you noticed a decline in your color and coating consistency? Does your quality fluctuate even slightly over time? These may be indications of a plugged anilox roll in need of deep cleaning. Clean anilox rolls are essential to achieve uniform color and coating coverage and ensure consistent quality. Our anilox roll cleaning service is the smart way for printers to get the benefits of the MicroClean System without making the capital investment. It's fast, easy, and affordable.

Call 508.830.9506 today to schedule your roll cleaning service and experience the MicroClean™ difference.

"It was an easy decision to continue using the MicroClean roll cleaning service after we saw one of our anilox roll's cell volume restored to like-new condition. We shipped out our second roll to be cleaned today."

Joey Dowding
Mainline Printing

FLEXOCONCEPTS

3 Reasons why customers use our MicroClean™ Anilox Roll Cleaning Service

1. Improve Product Consistency

Plugged cells on your anilox roll have a direct impact on your product quality. Make MicroClean a part of your regular maintenance program to ensure color and coating consistency.

2. Save Thousands of Dollars

Avoid expensive re-engraving costs by deep cleaning your rolls. In most cases, our roll cleaning service will cost less than 10% of the price to re-engage.

3. Maximize Press Up-Time

Send us your plugged rolls for cleaning and we'll return them restored to their original volume in just days. Minimize downtime and eliminate the mess and hassle of on-press cleaning.
